HIGH DENSITY ELECTROMAGNETIC SYSTEM

CoreSculpt

MAGNETIC FIELD

The **CoreSculpt** is a device that guides people to maintain a healthy body for life through the process of sculpting people's bodies beautifully into muscles.

The strong pulsed magnetic field of this **CoreSculpt** is instantaneously transmitted to a conductor that is easily transmitted by a magnetic field such as the human body, resulting in an eddy current. These induced biocurrents affect each tissue of the human body by electrophysiological mechanisms, and these electrophysiological effects appear in sensory nerves, blood vessels, bone tissues, etc.

The magnetic field is **not only harmless to the human body, but also penetrates deep into the human body, activates cells, and affects nerves and muscle tissue**, resulting in excellent treatment results.
