# INOFUS

## CWM (Continuous Working Mode) Technology The newest high-intensity Focused Ultrasound technology

- Traditional Cartridges shoot lines only one by one, each time starting from the beginning to the end of the cartridge
- INOFUS keeps shooting continuous shots from left to right and right to left
- This makes INOFUS faster with continuous peak power output the whole time non-stop

### Convenient Treatment

- Recommended protocols according to the treatment site are stored

### Face Lifting & Tightening

- Face Line
- Eyebrow & Forehead
- Wrinkles
- Nasolabial fold
