

# ABBAS CLEAR

- Barrier reconstruction
- Repair damaged skin
- Firming and anti-aging
- Smoothing wrinkles and reshaping
- Whitening and moisturizing

## FUNCTIONAL ADVANTAGES

- Not bound to consumables, products can be matched according to actual conditions
- The cost of supporting consumables is low, reducing costs and increasing profit margins
- Large flow rate for real cleaning, passive cleaning turns to active cleaning
- 360° rotating head is softer and more friendly to "problem skin"

## HANDLE DISPLAY — 4

### Spiral cleaning handle

The handle adopts a new cleaning concept of large flow and high rotation. The powerful aqueous solution and the high-speed rotating soft silicone cleaning head can effectively remove the keratin dirt on the epidermis of the skin quickly. No damage to the skin. It can deeply clean all parts of the face.

### Plasma-sterilized handle

The handle adopts the new concept of true sterility to reconstruct the skin microecology, and uses plasma ozone sterilization technology to achieve the effects of sterilization, antibacterial, anti-inflammatory, balancing bacteria and promoting skin regeneration. Reconstruct the skin microecology and create healthy skin.

## KNOWLEDGE EXPLANATION

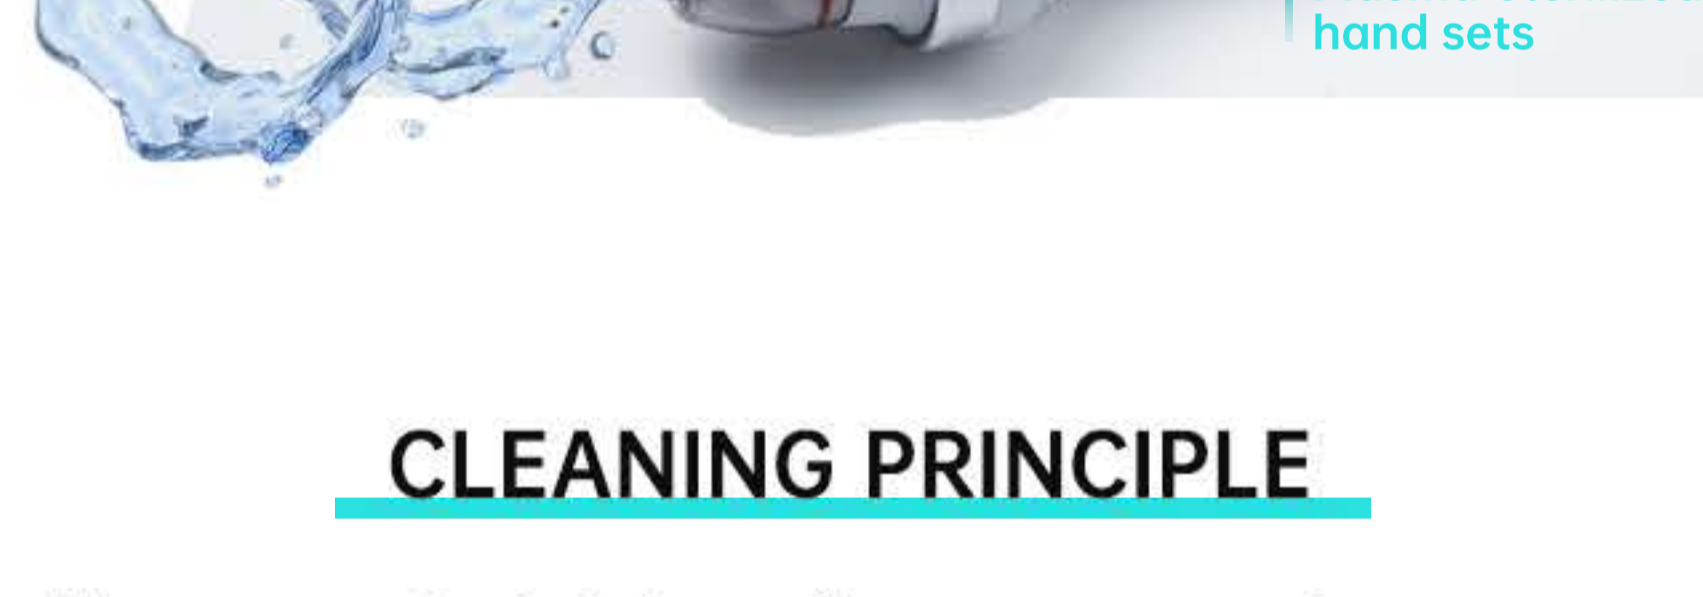

### INSTRUMENT INTRODUCTION

Abbasclear, plasma technology, can effectively kill bacteria, fungi, mites, etc., reconstruct the skin microecology and effectively improve skin problems caused by bacteria and fungi, while increasing the hydrophilicity of the skin and promoting the absorption of nutrients, thereby improving the overall quality of the skin.

Secondly, plasma can accelerate the metabolism of skin cells, promote cell renewal and repair, reduce the appearance of wrinkles and fine lines, and make the skin tighter and smoother.

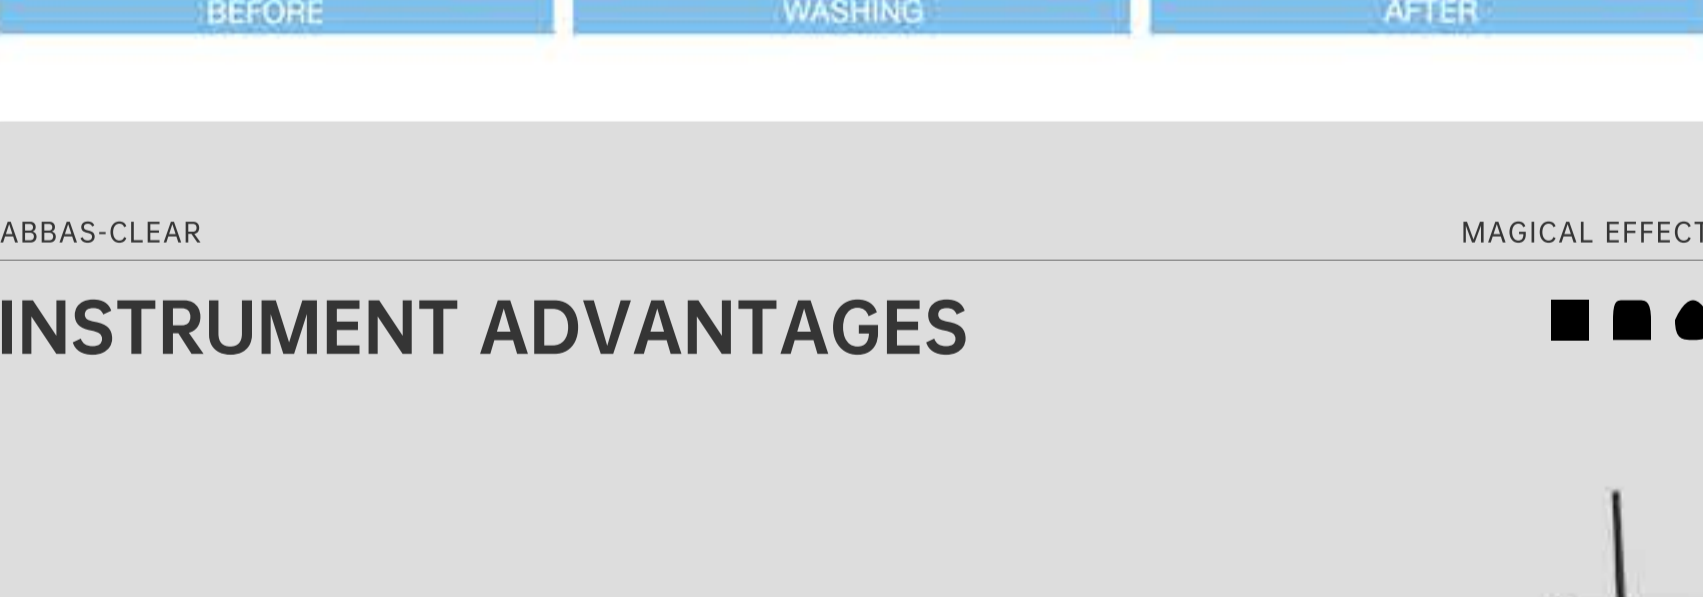

### INSTRUMENT INTRODUCTION

Abbasclear uses active deep cleaning technology. Compared with traditional cleansers that simply rely on strong negative pressure suction and high positive pressure strong washing, which destroys the epidermal barrier and causes secondary damage to the skin, abbasclear has undergone a major technical upgrade, actively cleaning, without damage, and cleaner.

### CLEANING PRINCIPLE

The vacuum circuit is formed by vacuum negative pressure, and a large amount of nutrient solution is introduced. The specially designed spiral silicone soft head is used to remove dead skin in the stratum corneum and the suction head acts directly on the skin. The large flow introduction can easily penetrate into the pores, and remove the dirt in the pores, such as sebum, black and white hair, aging products, etc., in a safe and painless state, while replenishing nutrients for the hair follicle funnel.

## INSTRUMENT ADVANTAGES

- CLEAN SKIN**  
REMOVE THE DIRT, OIL AND AGING CUTIN ON THE SKIN SURFACE, HELP TO IMPROVE THE ROUGH CONDITION OF THE SKIN, AND MAKE THE SKIN BECOME MORE SMOOTH AND DELICATE.
- ANTI-INFLAMMATORY**  
REDUCE THE NUMBER OF BACTERIA ON THE SKIN, TIMPROVE ACNE MUSCLE, CAN RELIEVE SKIN INFLAMMATION, PREVENT FURTHER BREEDING OF ACNE.
- PROMOTE ABSORPTION**  
PROMOTE THE ABSORPTION OF SKIN CARE PRODUCTS, IMPROVE THE EFFECT OF SKIN CARE.

## TREATMENT EFFECT

### GO BLACK HEAD CONTRAST

### CONTRAST OF SYSTOLIC PORES

### CONTROL OIL COMPARISON
