

# ABBAS-MAX

Tender skin replenish water | Restore skin vitality | Repair sensitive muscle

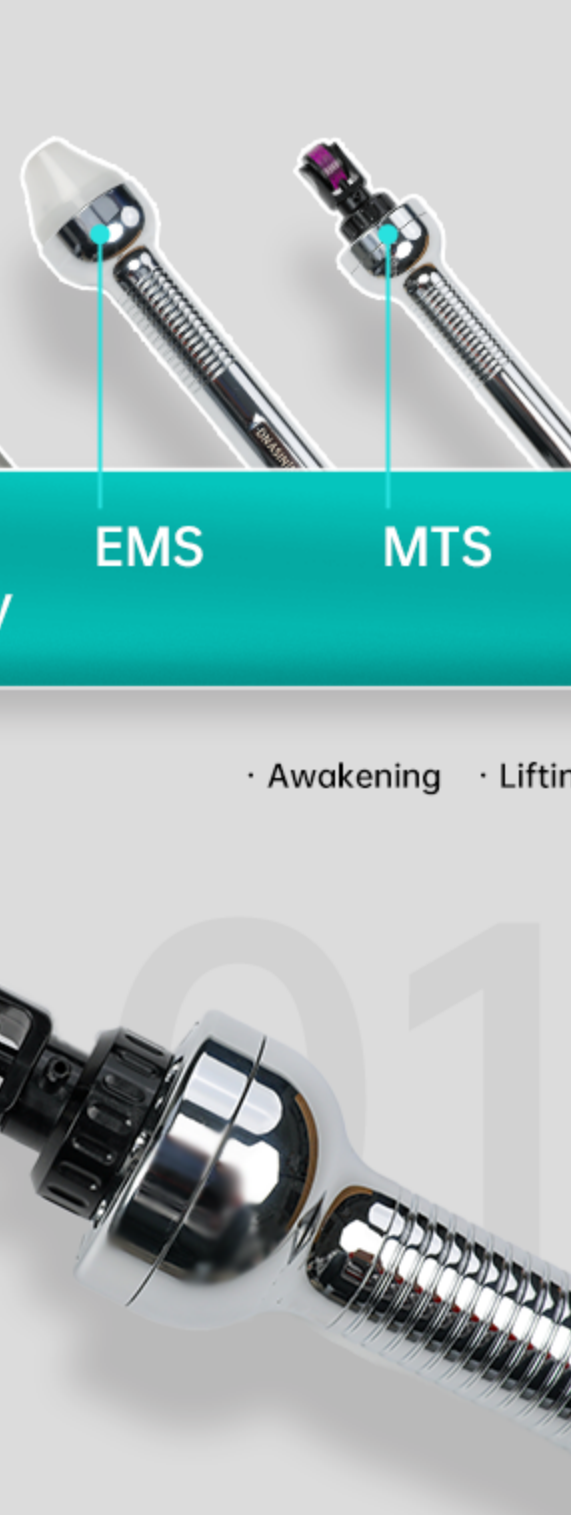

Rebuild skin barrier | Firm wrinkle

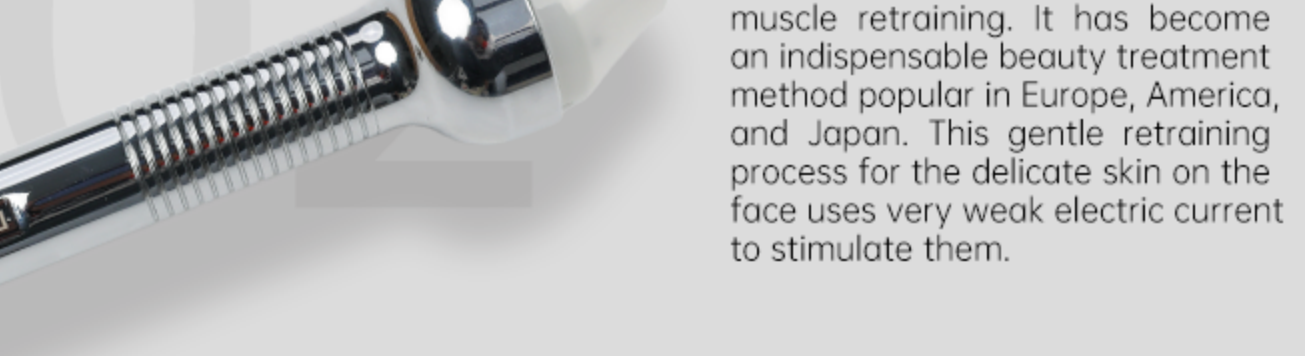

ABBAS-MAX MAGICAL EFFECT

## FUNCTIONAL ADVANTAGES

- The time required for each treatment is short (about 15 to 30 minutes).
- High-tech design, safe and easy to use.
- Intelligent touch control large screen, inspiration and quick response
- The energy output of the instrument is stable, safe and reliable.

## HANDLE DISPLAY — 4

Water oxygen | Restore skin vitality | EMS | MTS

· Awakening · Lifting

### ■ MTS

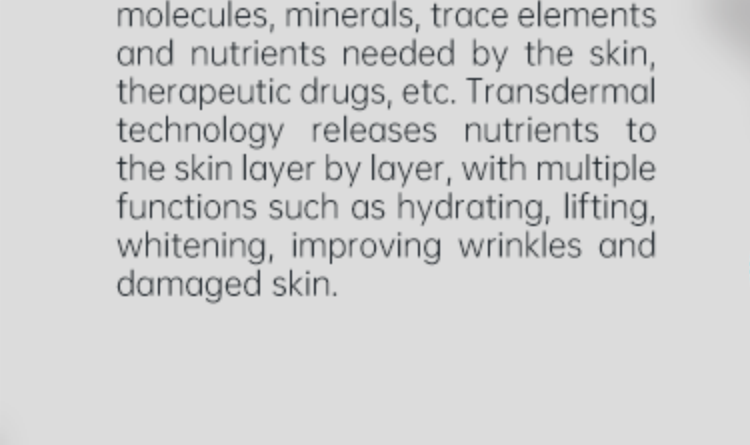

MTS rolling needle therapy, also known as Microneedle Therapy System (MTS), is a natural method that stimulates collagen proliferation without damaging the epidermis, thereby awakening and enhancing the skin's regeneration function.

· Awakening · Lifting

### ■ EMS

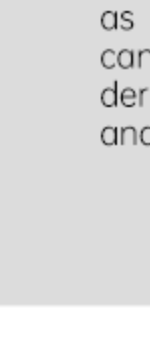

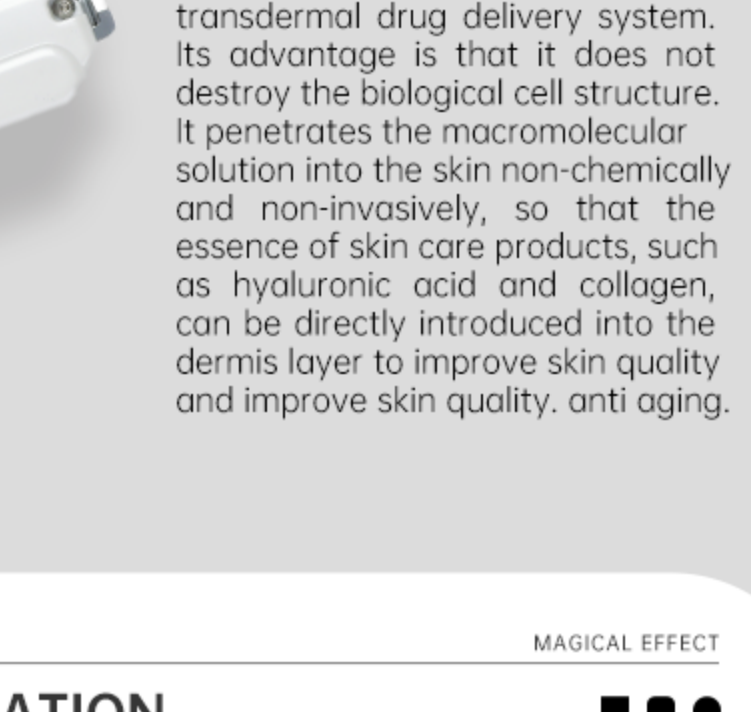

EMS microcurrent technology is the only technology that can tighten and stretch soft, sagging, and wrinkled skin on the body through muscle retraining. It has become an indispensable beauty treatment method popular in Europe, America, and Japan. This gentle retraining process for the delicate skin on the face uses very weak electric current to stimulate them.

· Awakening · Lifting

### ■ Water oxygen

Non-invasive water light is to use high-end equipment to combine water-rich hyaluronic acid, oxygen molecules, minerals, trace elements and nutrients needed by the skin, therapeutic drugs, etc. Transdermal technology releases nutrients to the skin layer by layer, with multiple functions such as hydrating, lifting, whitening, improving wrinkles and damaged skin.

Ultra-fine needle high pressure uniform atomization

· Awakening · Lifting

### ■ Ionizing handle

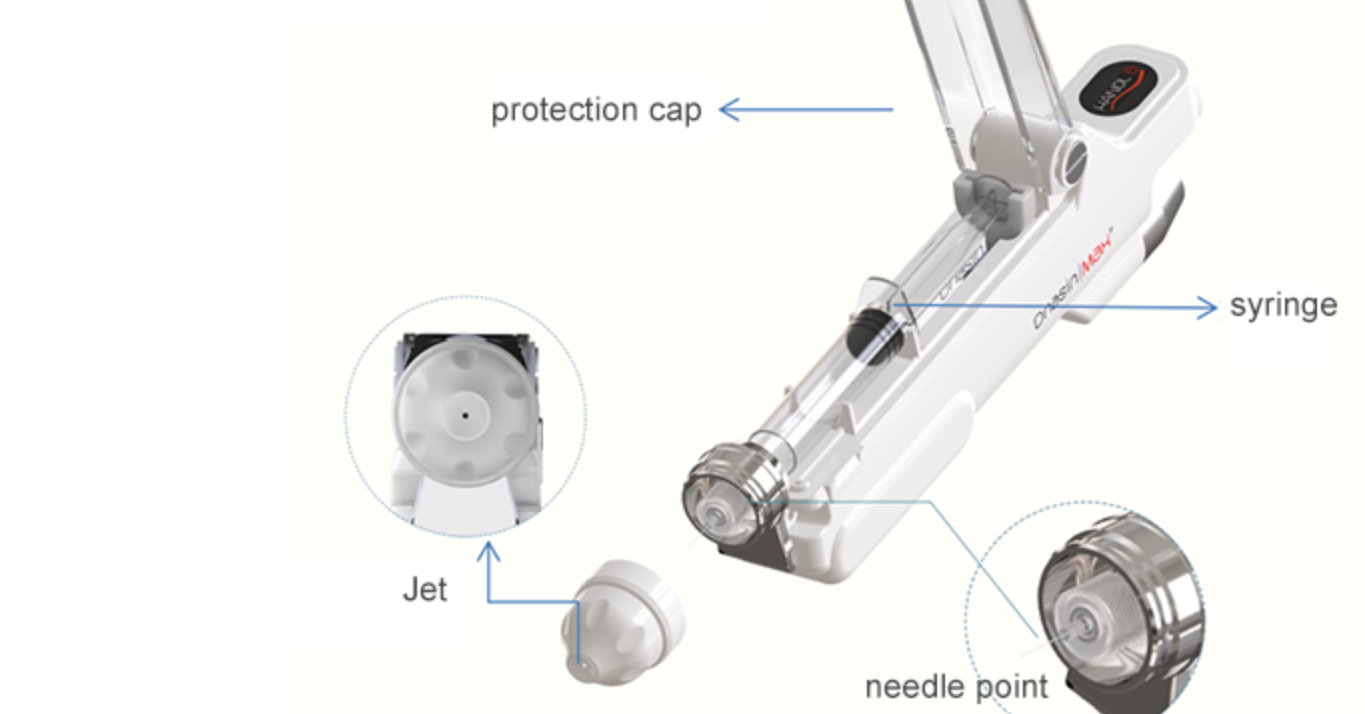

Electroporation is an effective transdermal drug delivery system. Its advantage is that it does not destroy the biological cell structure. It penetrates the macromolecular solution into the skin non-chemically and non-invasively, so that the essence of skin care products, such as hyaluronic acid and collagen, can be directly introduced into the dermis to improve skin quality and improve skin quality, anti aging.

## KNOWLEDGE EXPLANATION

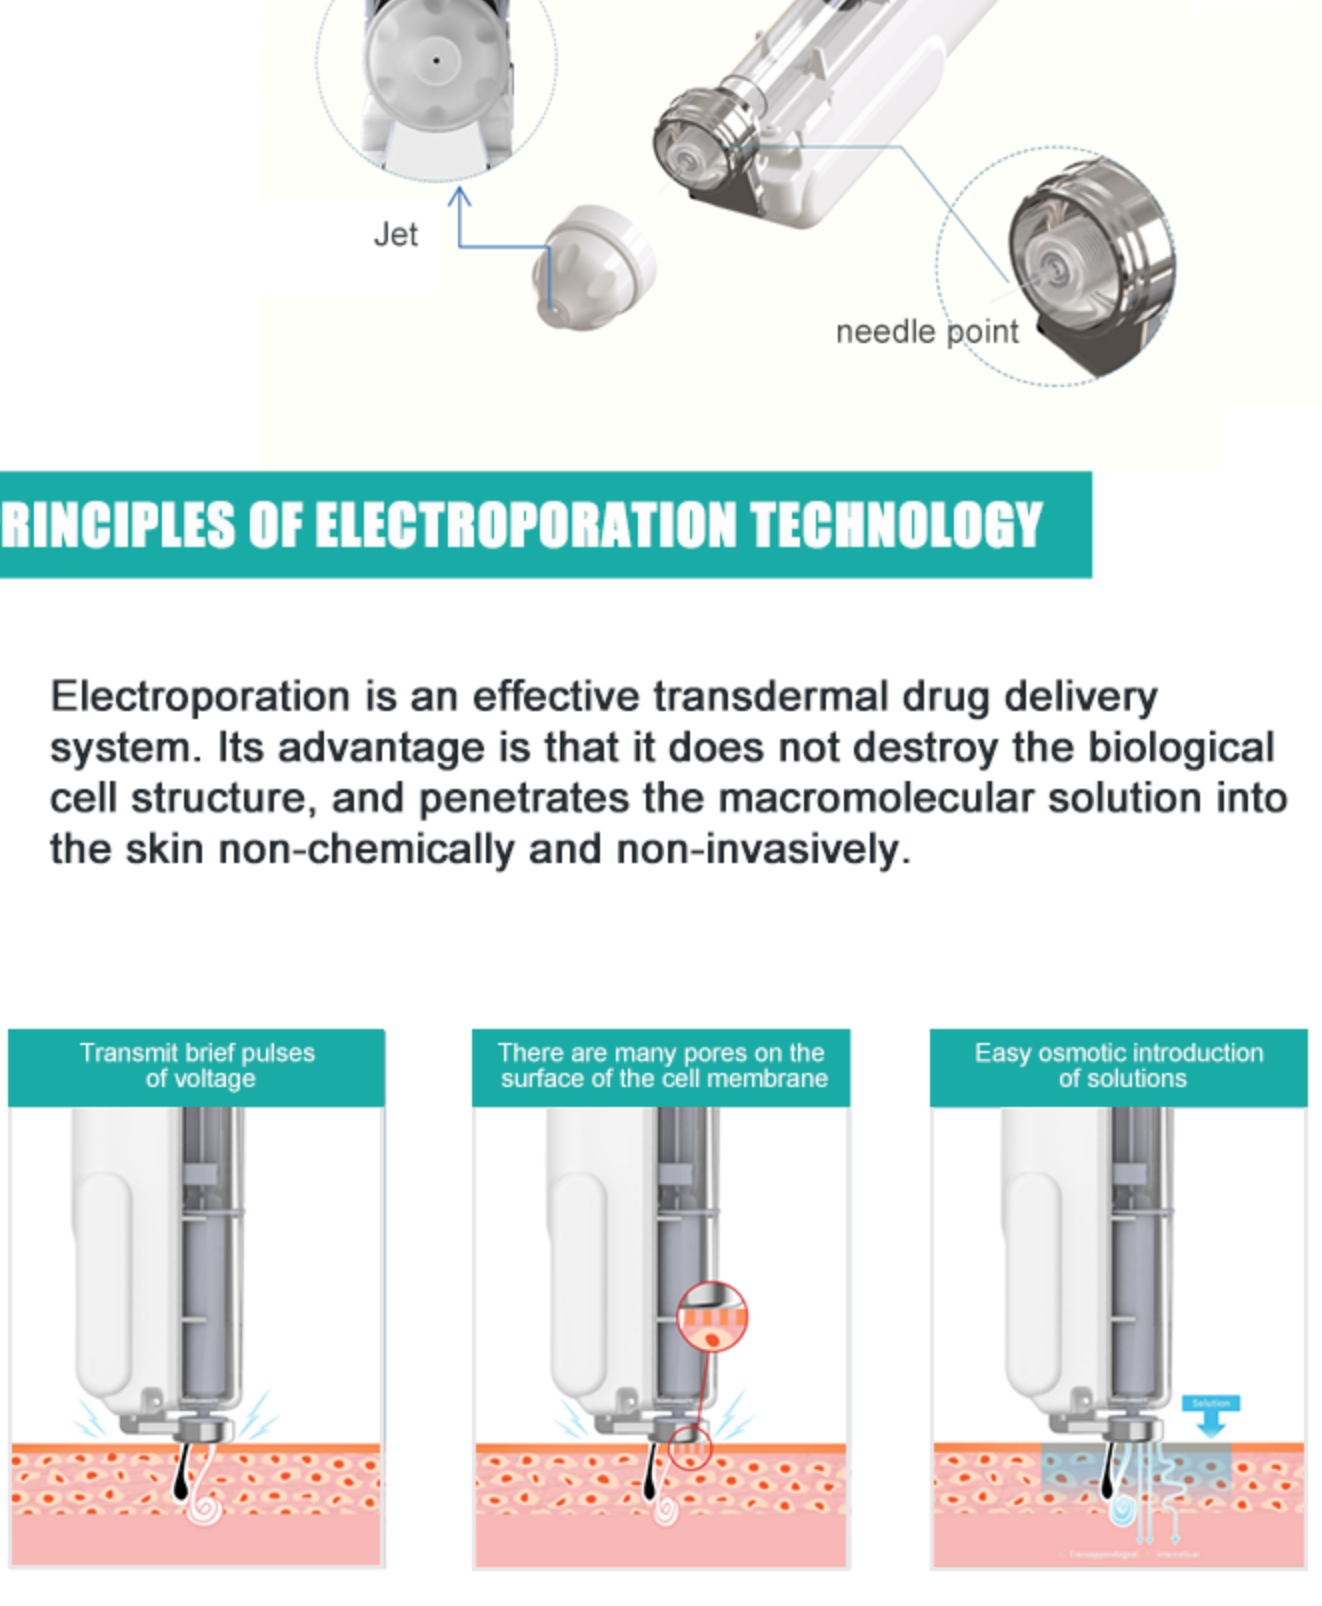

### NON-INVASIVE WATER LIGHT TECHNOLOGY

Non-invasive water light is the use of high-end equipment to combine water-rich hyaluronic acid, oxygen molecules, minerals, trace elements, etc. Transdermal technology releases nutrients to the skin layer by layer.

### ADVANTAGES OF NON-INVASIVE WATER LIGHT TECHNOLOGY

The non-invasive water-light technology compresses the air, thereby using high pressure to uniformly atomize the product, the product enters the deep layer of the skin, can stimulate the skin's metabolism to speed up, quickly discharge the melanin in the skin body, improve the dark yellow and dry skin, brighten the skin tone, and make the skin Brightening and whitening, it has the effect of shrinking the pores of cells, making the skin firmer and smoother, and stretching the fine lines on the face, crows feet, and Sichuan Frown. Firming skin, non-free water, light acupuncture Non-invasive. Firming skin, no pain, no incision, no recovery period.

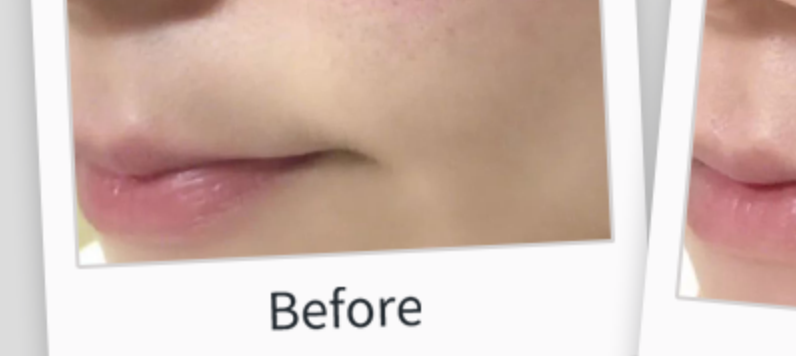

## PRINCIPLES OF ELECTROPORATION TECHNOLOGY

Electroporation is an effective transdermal drug delivery system. Its advantage is that it does not destroy the biological cell structure, and penetrates the macromolecular solution into the skin non-chemically and non-invasively.

## INSTRUMENT ADVANTAGES

- **SECURITY INTELLIGENCE**  
HIGH-TECH DESIGN, SAFE AND EASY TO USE.
- **PAINLESS AND NON-INVASIVE**  
HIGH COMFORT, GOOD CUSTOMER EXPERIENCE. NO INFLAMMATION UNDER THE SKIN, GOOD IMMEDIATE EFFECT.
- **NO DOWNTIME**  
YOU CAN GO RIGHT AWAY WITHOUT AFFECTING YOUR SKIN CARE AND WITHOUT COMPLICATED POST-OPERATIVE CARE.
